

EMS SOLUTIONS™ Inc.

Welcome to the **MICU Administrator's Management Series...**

We at EMS Solutions have improved upon our software in 1999, by making your job of managing a Mobile Intensive Care Unit even simpler than before. We now have twelve specific files in our Windows-based package which perform the following functions:

+ The First, **MICU Personnel Records**, allows you to maintain records on all of your staff, including information on CEU & Division recertification tracking. It includes automatic generation of expiration warning and suspension letters as well as OEMS documentation regarding Basic Skills and Recertification. A Memo tool is provided for making brief, general or personalized announcements to the staff.

+ The Second, **MICU Quality Assurance and Quarterly Reporting**, provides the tools to develop a percentage-based report on all run sheets by filling in a simple questionnaire regarding completion criteria and performance levels. The resulting data can be printed out automatically in the format of the OEMS MICU Quarterly Report. The data can also be extracted and exported to a spreadsheet or charting package.

In addition we now have included thru the companion Municipalities, etc. file the ability to load HCFA/Medicare codes and location identifiers and produce reports by location categories of all ALS-billable patients, along with mileage units for each patient per the latest regs.

+ The Third, **OEMS MICU Regulations**, provides you with an electronic compilation of the regulations governing a MICU in the State of New Jersey. The file may be searched for topical items or by regulation number to extract immediate documentation.

+ The Fourth, **MICP Student Records**, allows you to maintain records on all of your MICP students regarding their credentials, quiz scores and skill hours within their didactic and clinical programs. A Memo tool is provided for making brief, general or personalized announcements.

+ The Fifth, **EMT-D/FR-D Personnel Records**, allows you to maintain records on all of the EMT-D/FR-D providers in your region, with automatic generation of individual expiration warning and suspension letters as well as squad level reports.

+ The Sixth, **EMT-D Quarterly Report**, provides you with a tool which allows you to enter via a screen formatted like the EMT-D BLS Run Sheet, to complete the Quarterly EMT-D Report, automatically. Provided also is a CQIP model for EMT-D call analysis.

EMS SOLUTIONS™ Inc.

- + The Seventh, **EMT CEU Documentation**, is a file which provides you the ability of creating CEU Sign-In Sheets and, after the course is completed, generate the electronic submittal file to diskette for OEMS, eliminating the need for scan cards.
- + The Eighth, **EMT CEU Applications**, is a file which provides you the ability of creating CEU Course Applications and tracking the courses that you have taught.
- + The Ninth, **Vehicle Maintenance**, is a file which allows you to track service and maintenance, as well as associated costs, on your trucks and generate work orders for repair and service.
- + The Tenth, **Equipment Maintenance**, is a file which allows you to track service and maintenance on your capital equipment as well as identify its location within your unit inventory.
- + The Eleventh, **Materials Receiving**, is a file which allows you to record incoming materials and supplies into the unit and track associated costs of operation.
- + The Twelfth, **Municipalities, Hospitals and BLS Reference**, is a file which provides you with the municipal codes of all the town in NJ, hospital codes for all hospitals, BLS Squad data and HCFA location codes. All of these are editable and new data can be added to each category. This file is used as a reference to the MICU Call and EMT-D/FR-D files.

The MICU Management Package also has the ability to provide a Multi-User environment, in either a server-based or a peer-to-peer, serverless environment. We will be happy to discuss this with your MIS/IT groups.

Minimum configuration is a 80486/66Mhz CPU, Windows 95/98, 32 MB RAM and 25 MB of Hard Drive space for program, CD-ROM Drive.

Optimum configuration is a Pentium III 233Mhz or faster, Windows 95/98 or NT, 32MB or preferably 64MB of RAM, 50MB Hard Drive space for program, Data Back-up System, UPS, CD-ROM Drive.

As a Bonus, also included are two files for tracking your ICS Instructors and Courses, generating the standard form for the NJSP Cover Sheet for ICS Courses.

The price for this package is \$ 495.00
